

Economics (BA, BSc)

Choosing First Year Courses

Establishing the best first year schedule helps you set the foundation for a successful Acadia experience. To help with this, your department has recommended the courses you should register for in your first year. To make the process even easier for you, many departments will pre-register you for your required courses. Most programs allow you to choose and self-register for at least one elective in your first year. Academic advising is available at any stage should you need it.

First Year at a Glance (BA)

Required Courses

ECON 1013

Microeconomic Principles

ECON 1023

Introduction to the Study of Macroeconomics

MATH 1613 (or MATH 1013)

General Linear Algebra & Calculus for ECON/BUSI OR Introductory Calculus 1

Electives

21h Electives

Elective courses totaling 21 credit hours

Important Notes

You will need to register for the three named courses above (ECON 1013/1023 and either MATH 1613 or MATH 1013), and for your 21h of elective courses.

If you are strong in Math and/or might like to take more mathematical based Economics courses or take

more advanced courses in Math (e.g. completing a minor or a second major in Math), we would advise and encourage you to register for MATH 1013 rather than MATH 1613.

First Year at a Glance (BSc)

Required Courses

ECON 1013

Microeconomic Principles

ECON 1023

Introduction to the Study of Macroeconomics

MATH 1013

Introductory Calculus 1

MATH 1023

Introductory Calculus 2

Electives

18h Electives

Elective courses totaling 18 credit hours
