

Refresh AV Computing Camp 2

August 12, 2019 - August 16, 2019

Location: Patterson 213/214

BUILD is a week long dive into the world of Computer Science for girls 11 to 14. We will explore the basics of software development while building interactive artwork and literature, video games, and software that interacts with the physical world. Through our exploration we will also journey through use of hardware, refine our ideation skills and turn our ideas into software. Campers will also connect with Computer Scientists in our community who are changing the world one algorithm at a time.
